## Methodology

### Average map MLS L2 V3 10 days - 5°x5°

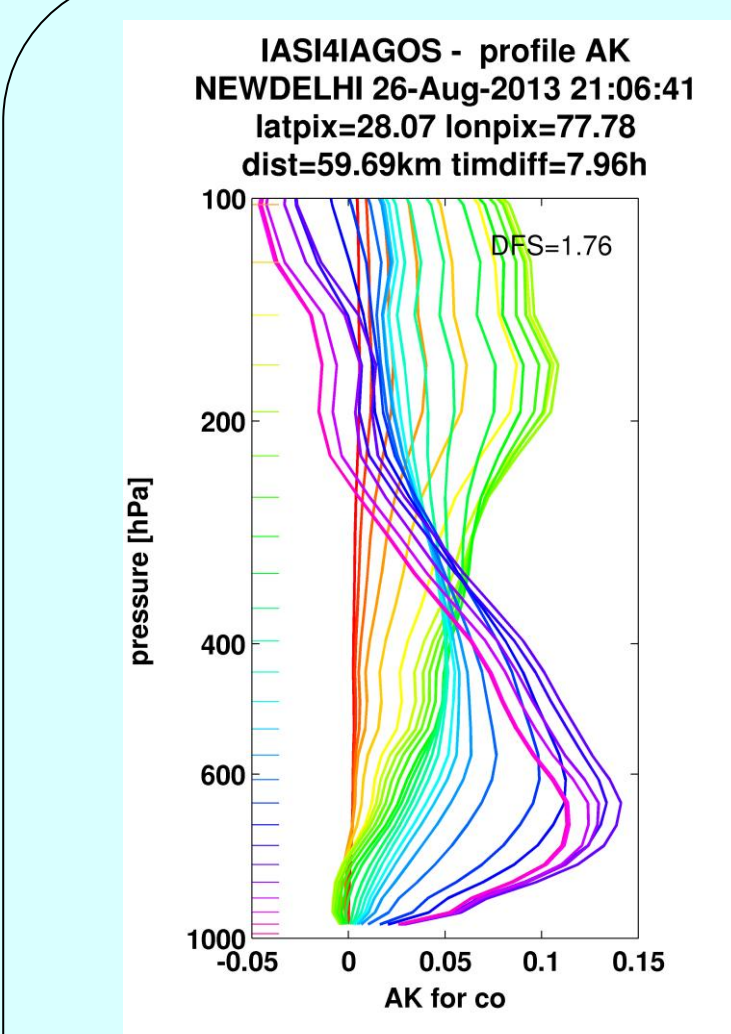

Collocation with  
IASI-SOFRID

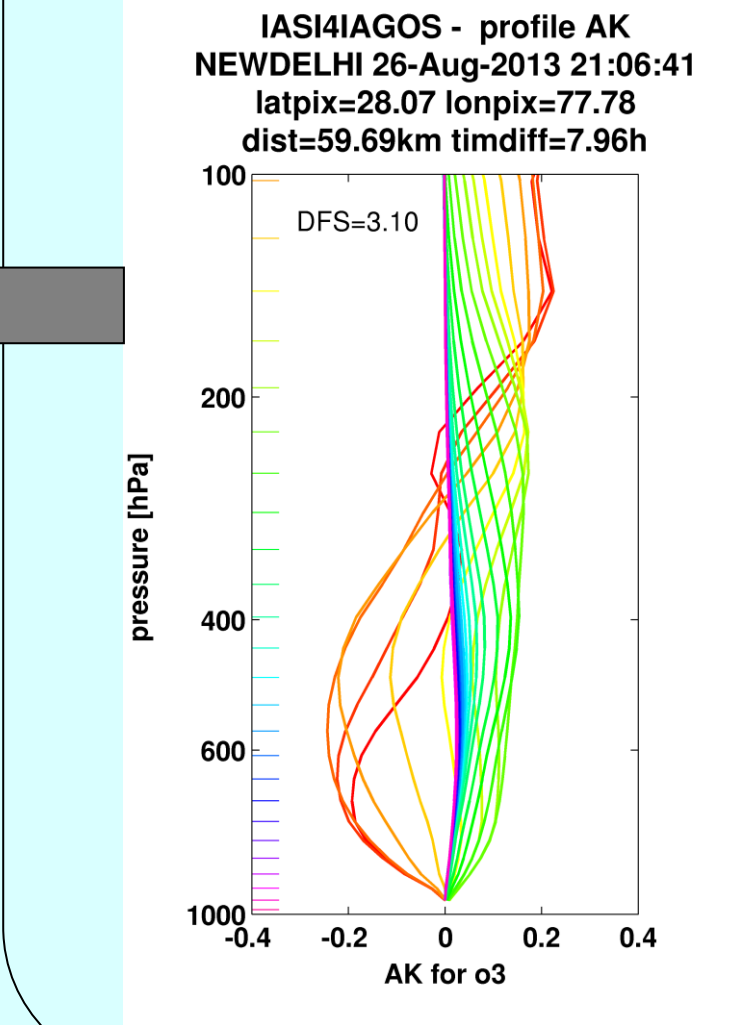

Calculation of  
Averaging Kernels

Convolution with  
averaging kernels

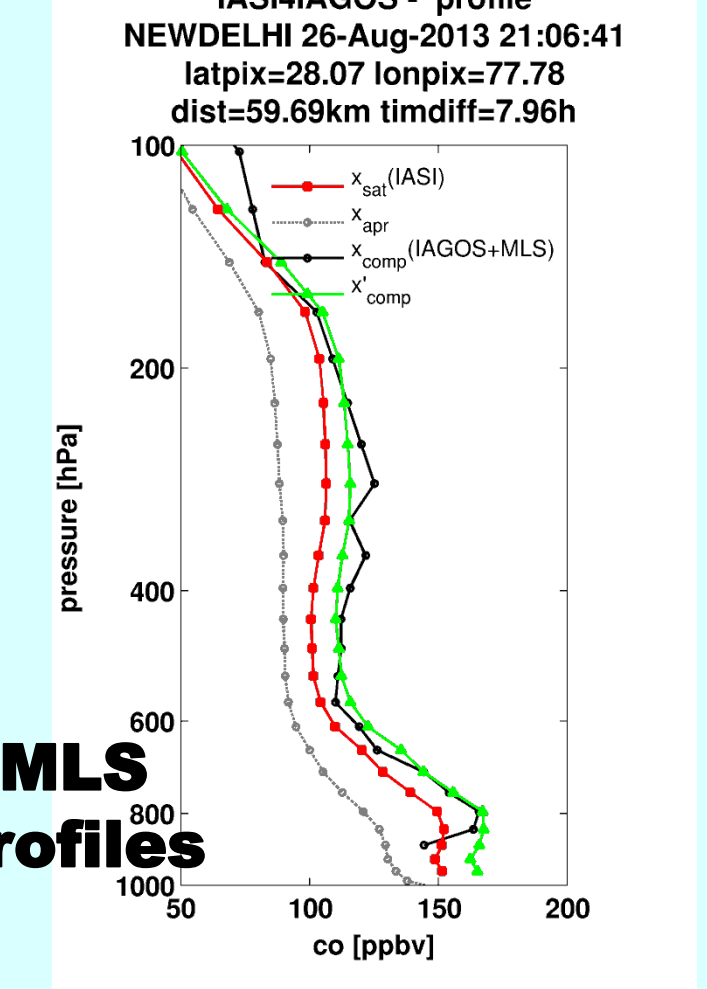

X

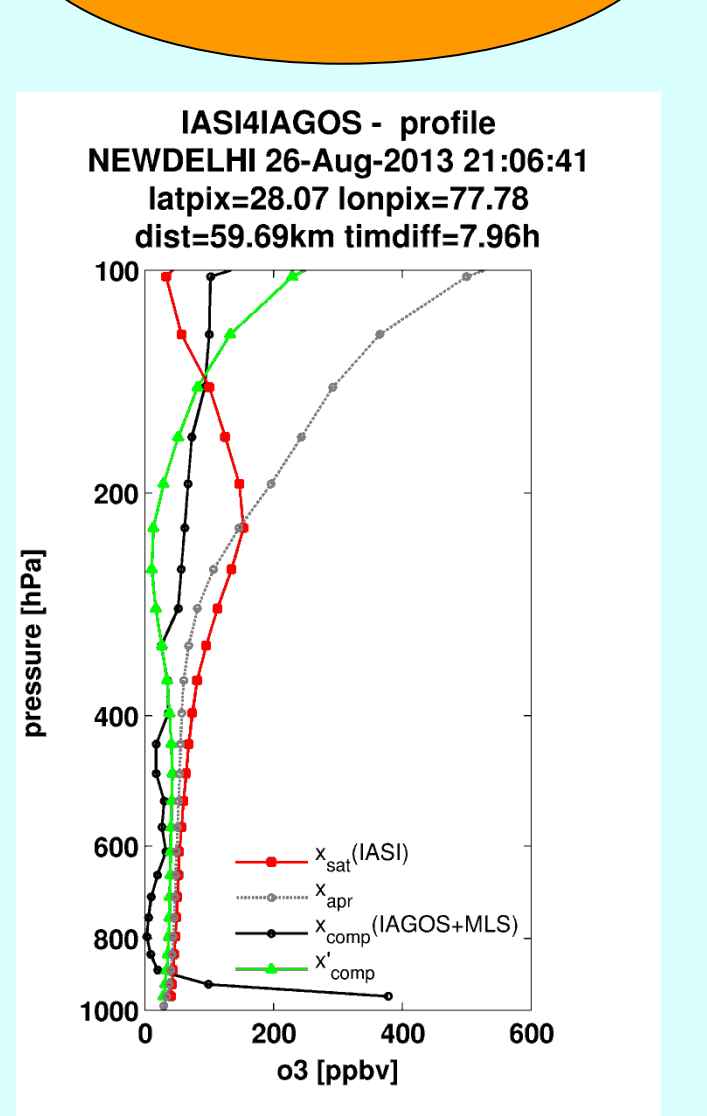

IASI averaging kernels

IASI and IAGOS-MLS  
(raw/smoothed) profiles

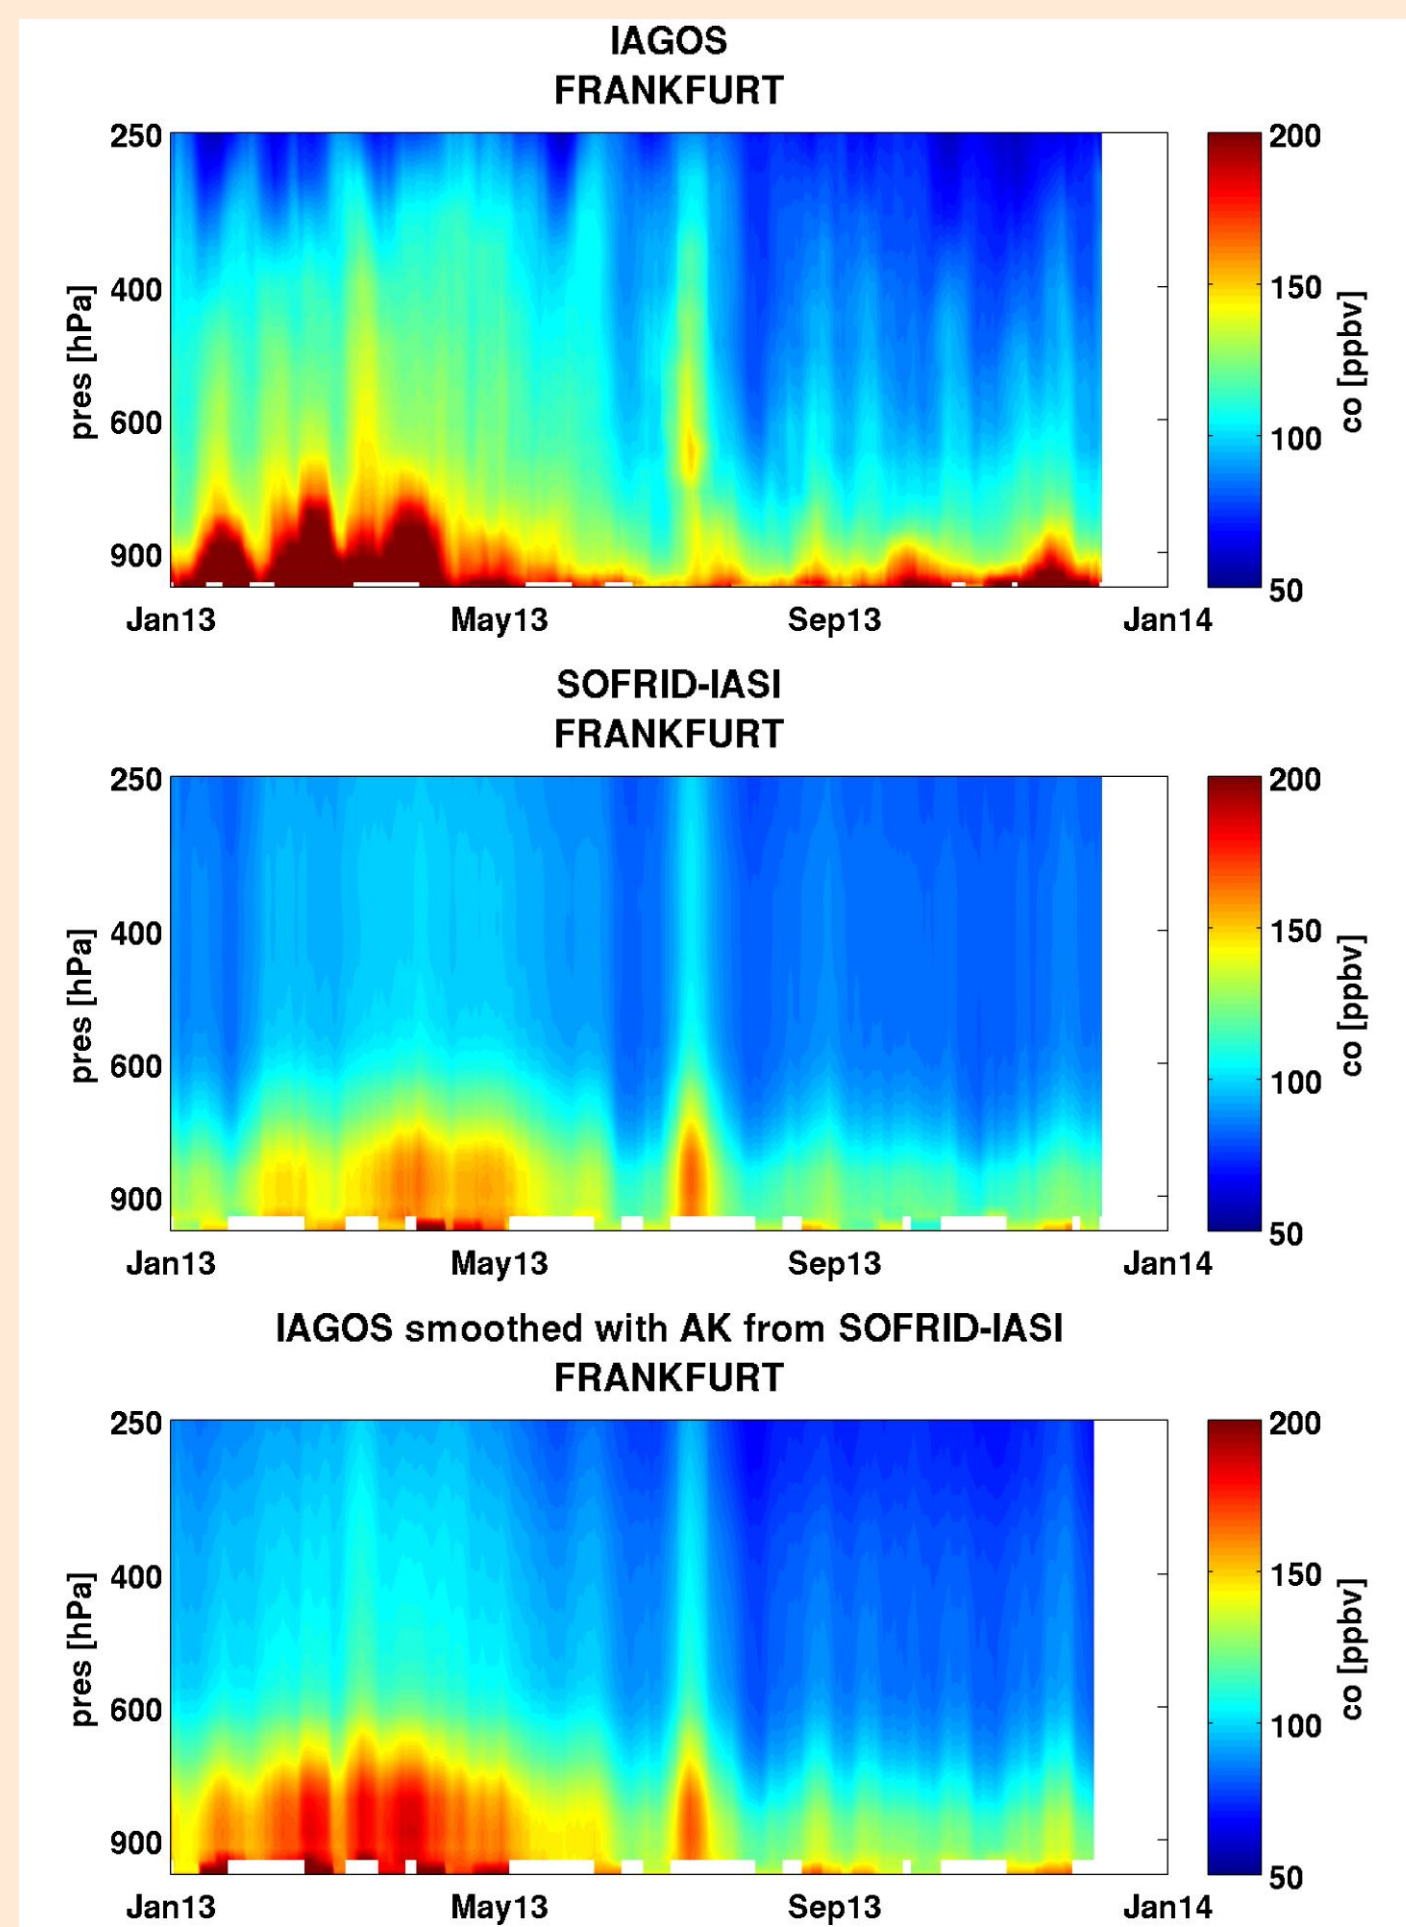

Comparison with IASI

Extention of IAGOS profile with MLS data ..... Application of IASI-SOFRID averaging kernels

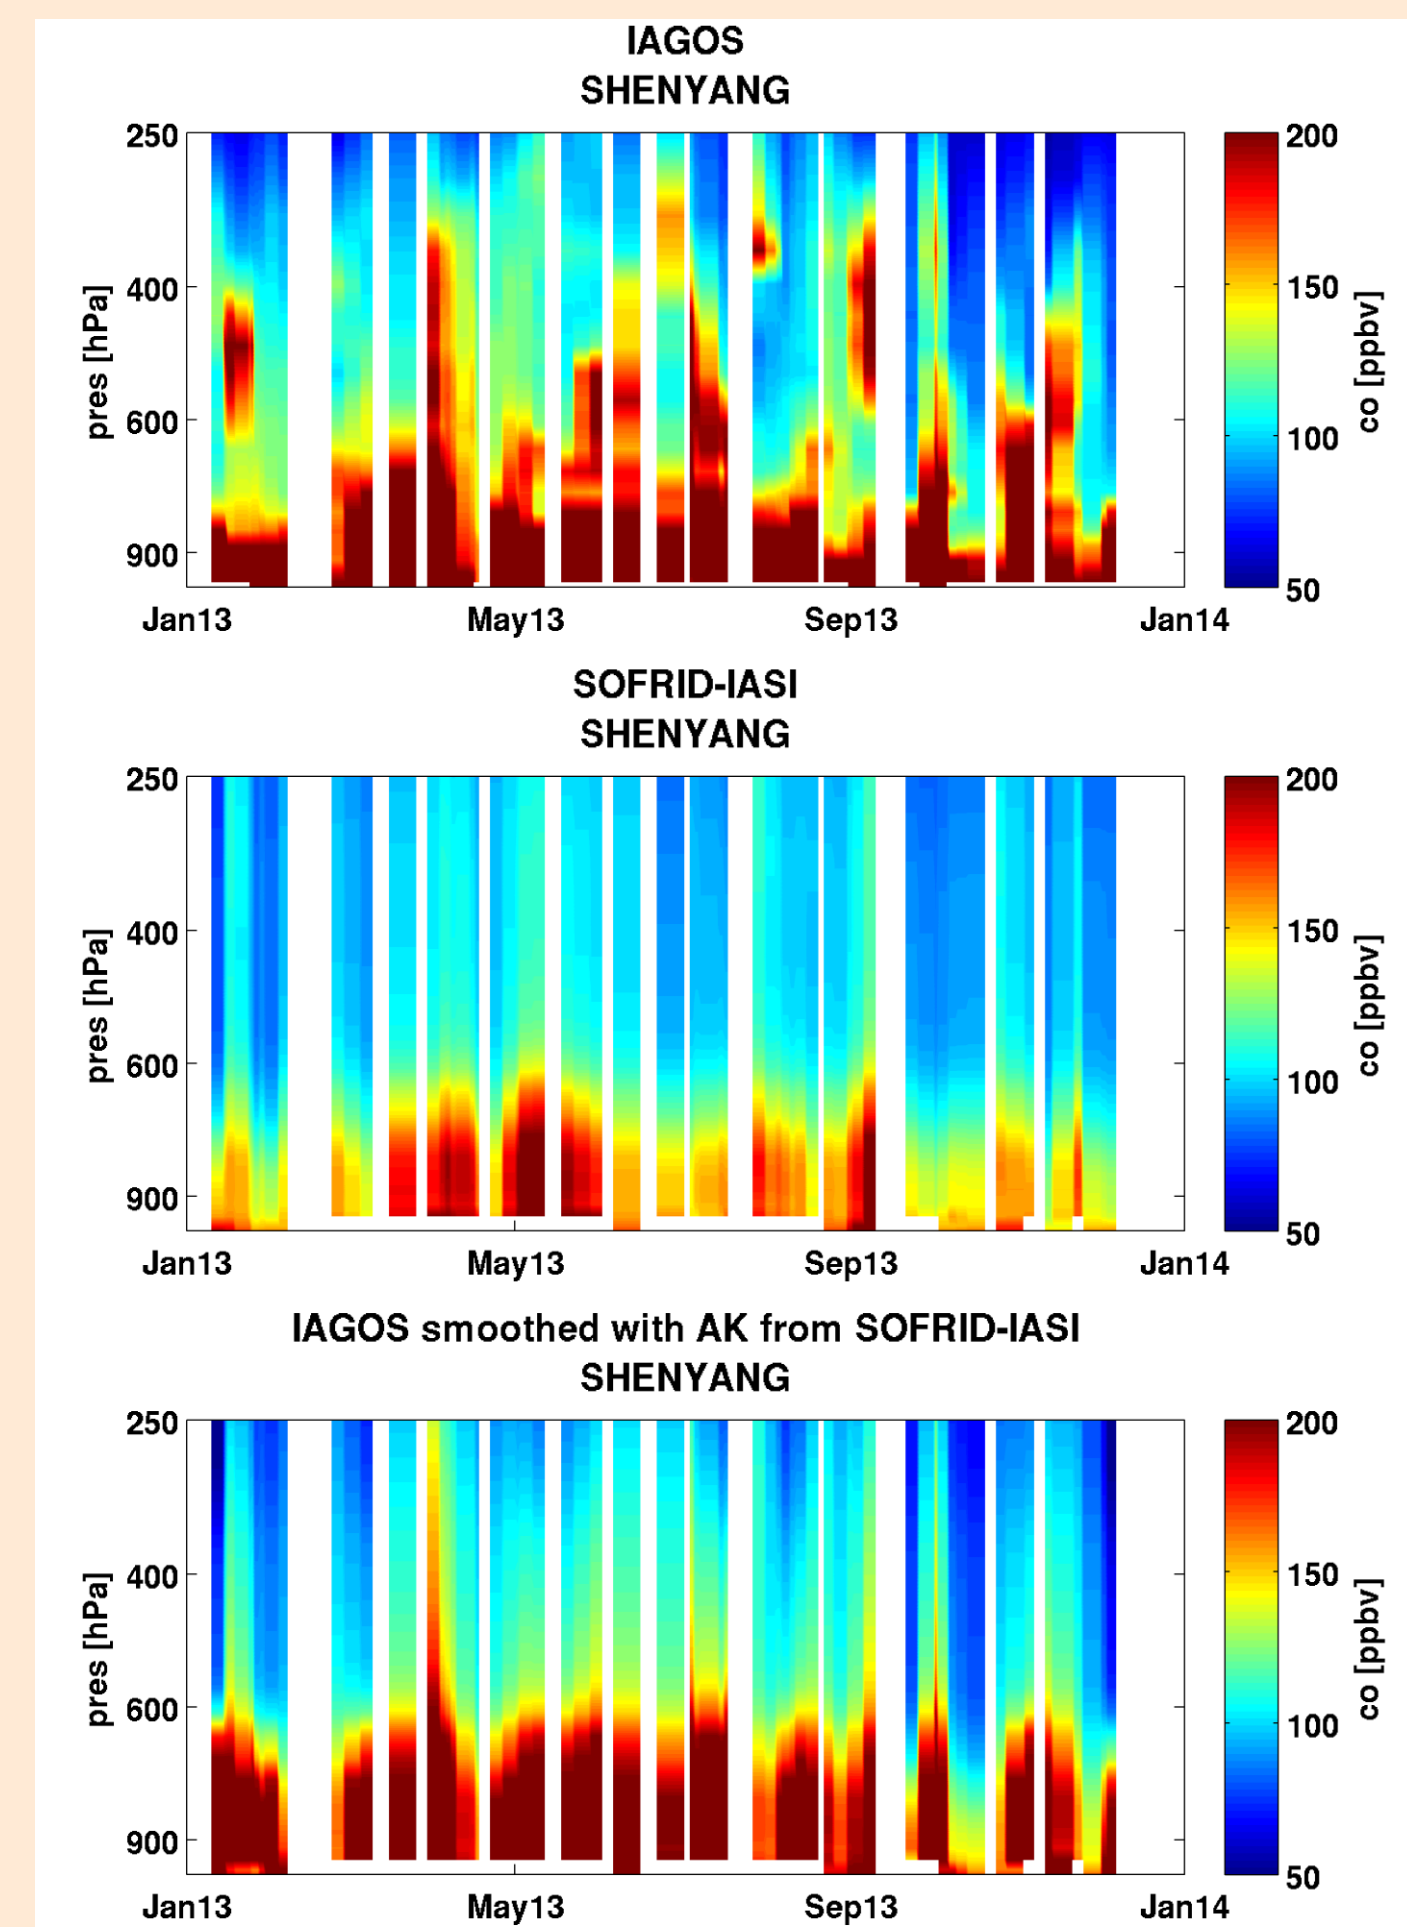

## Europe

### Germany - 2013

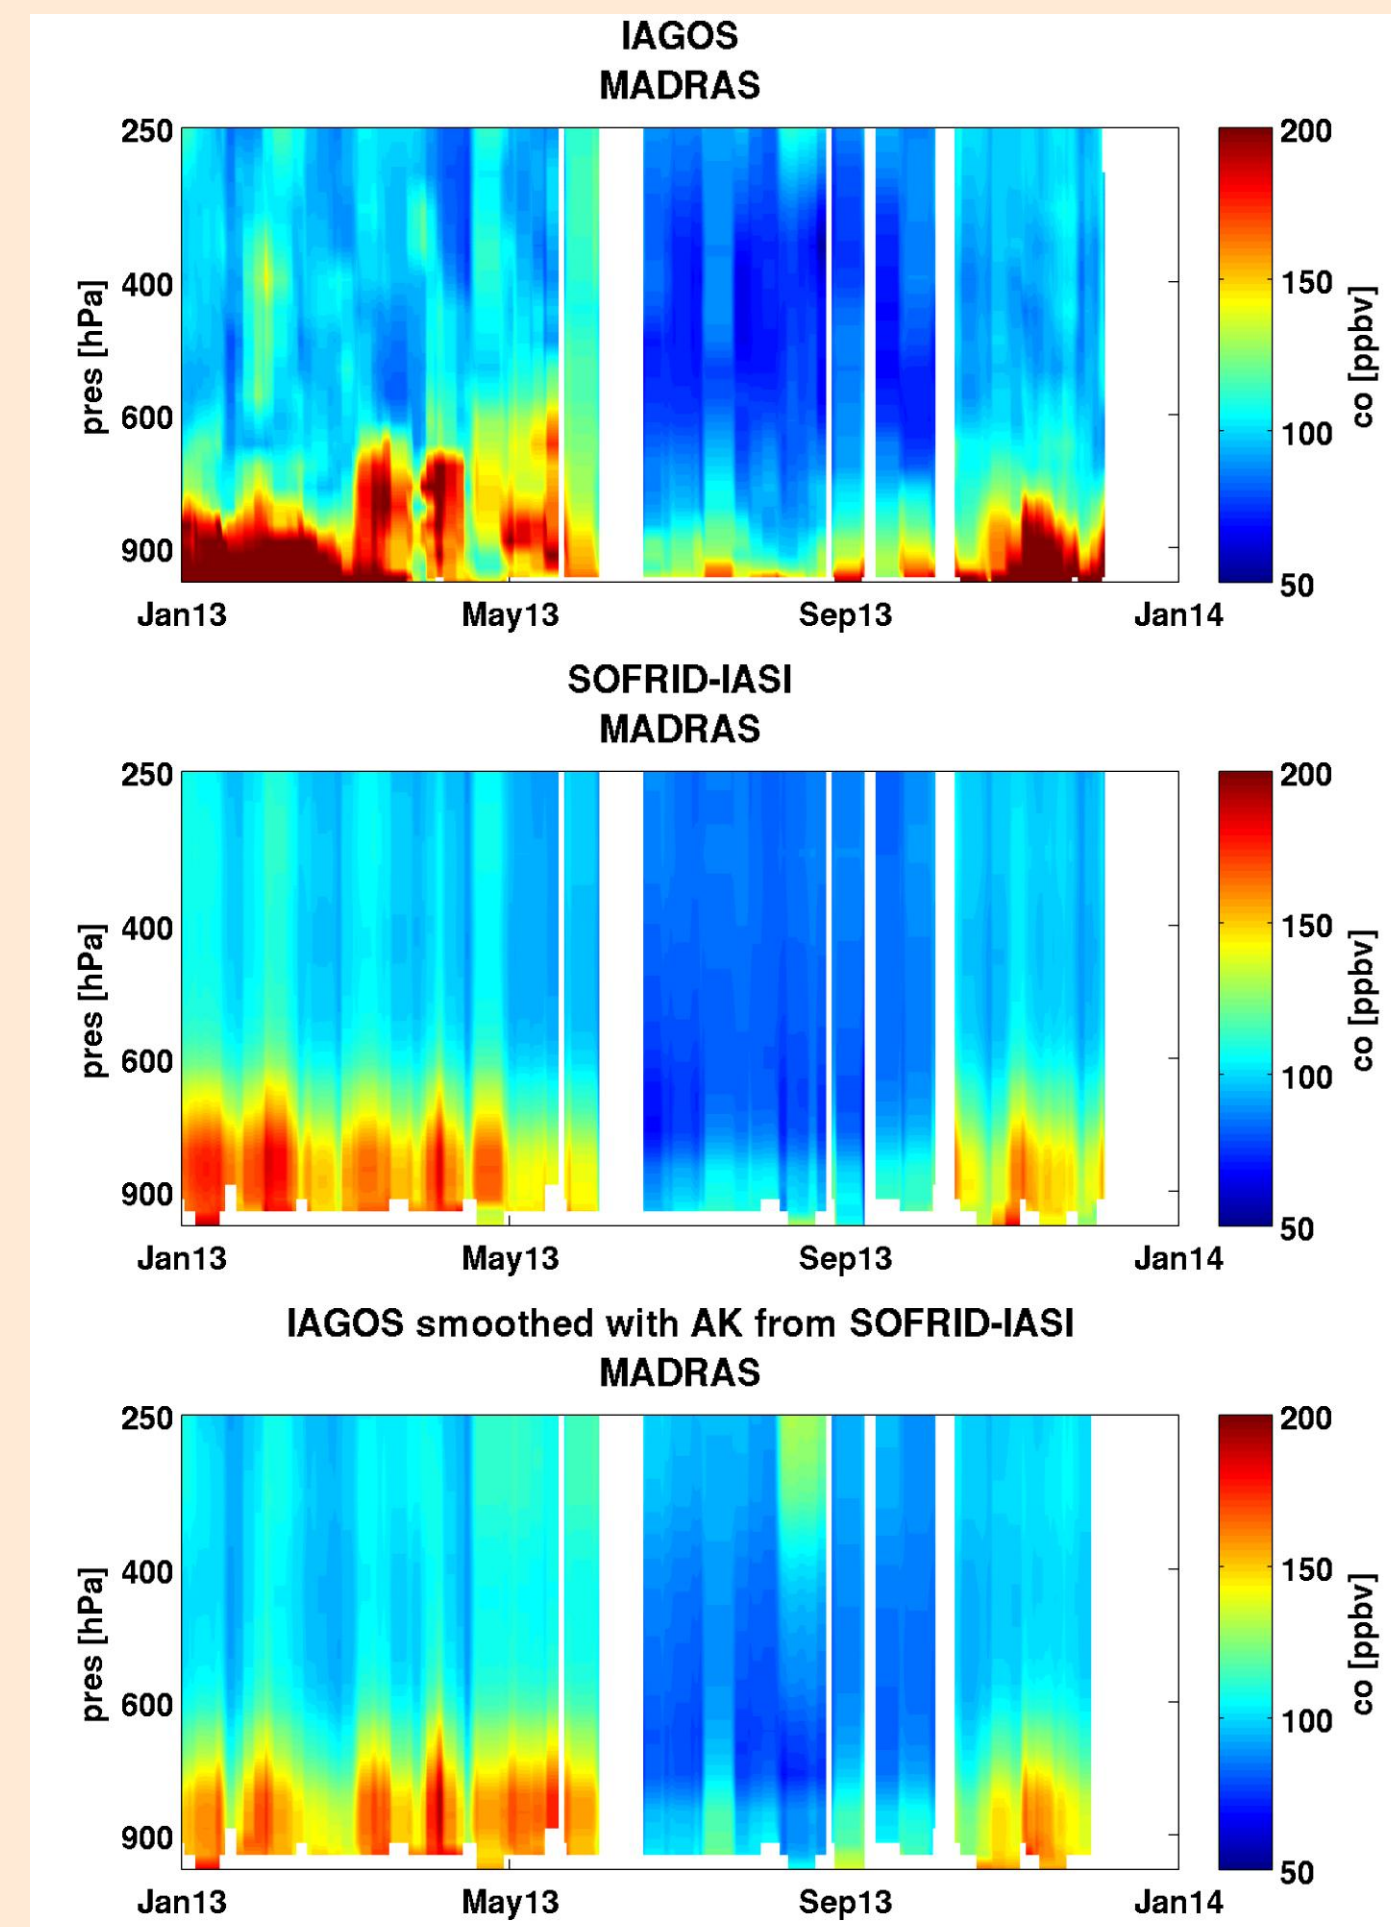

## Asian Pollution

### China - 2013

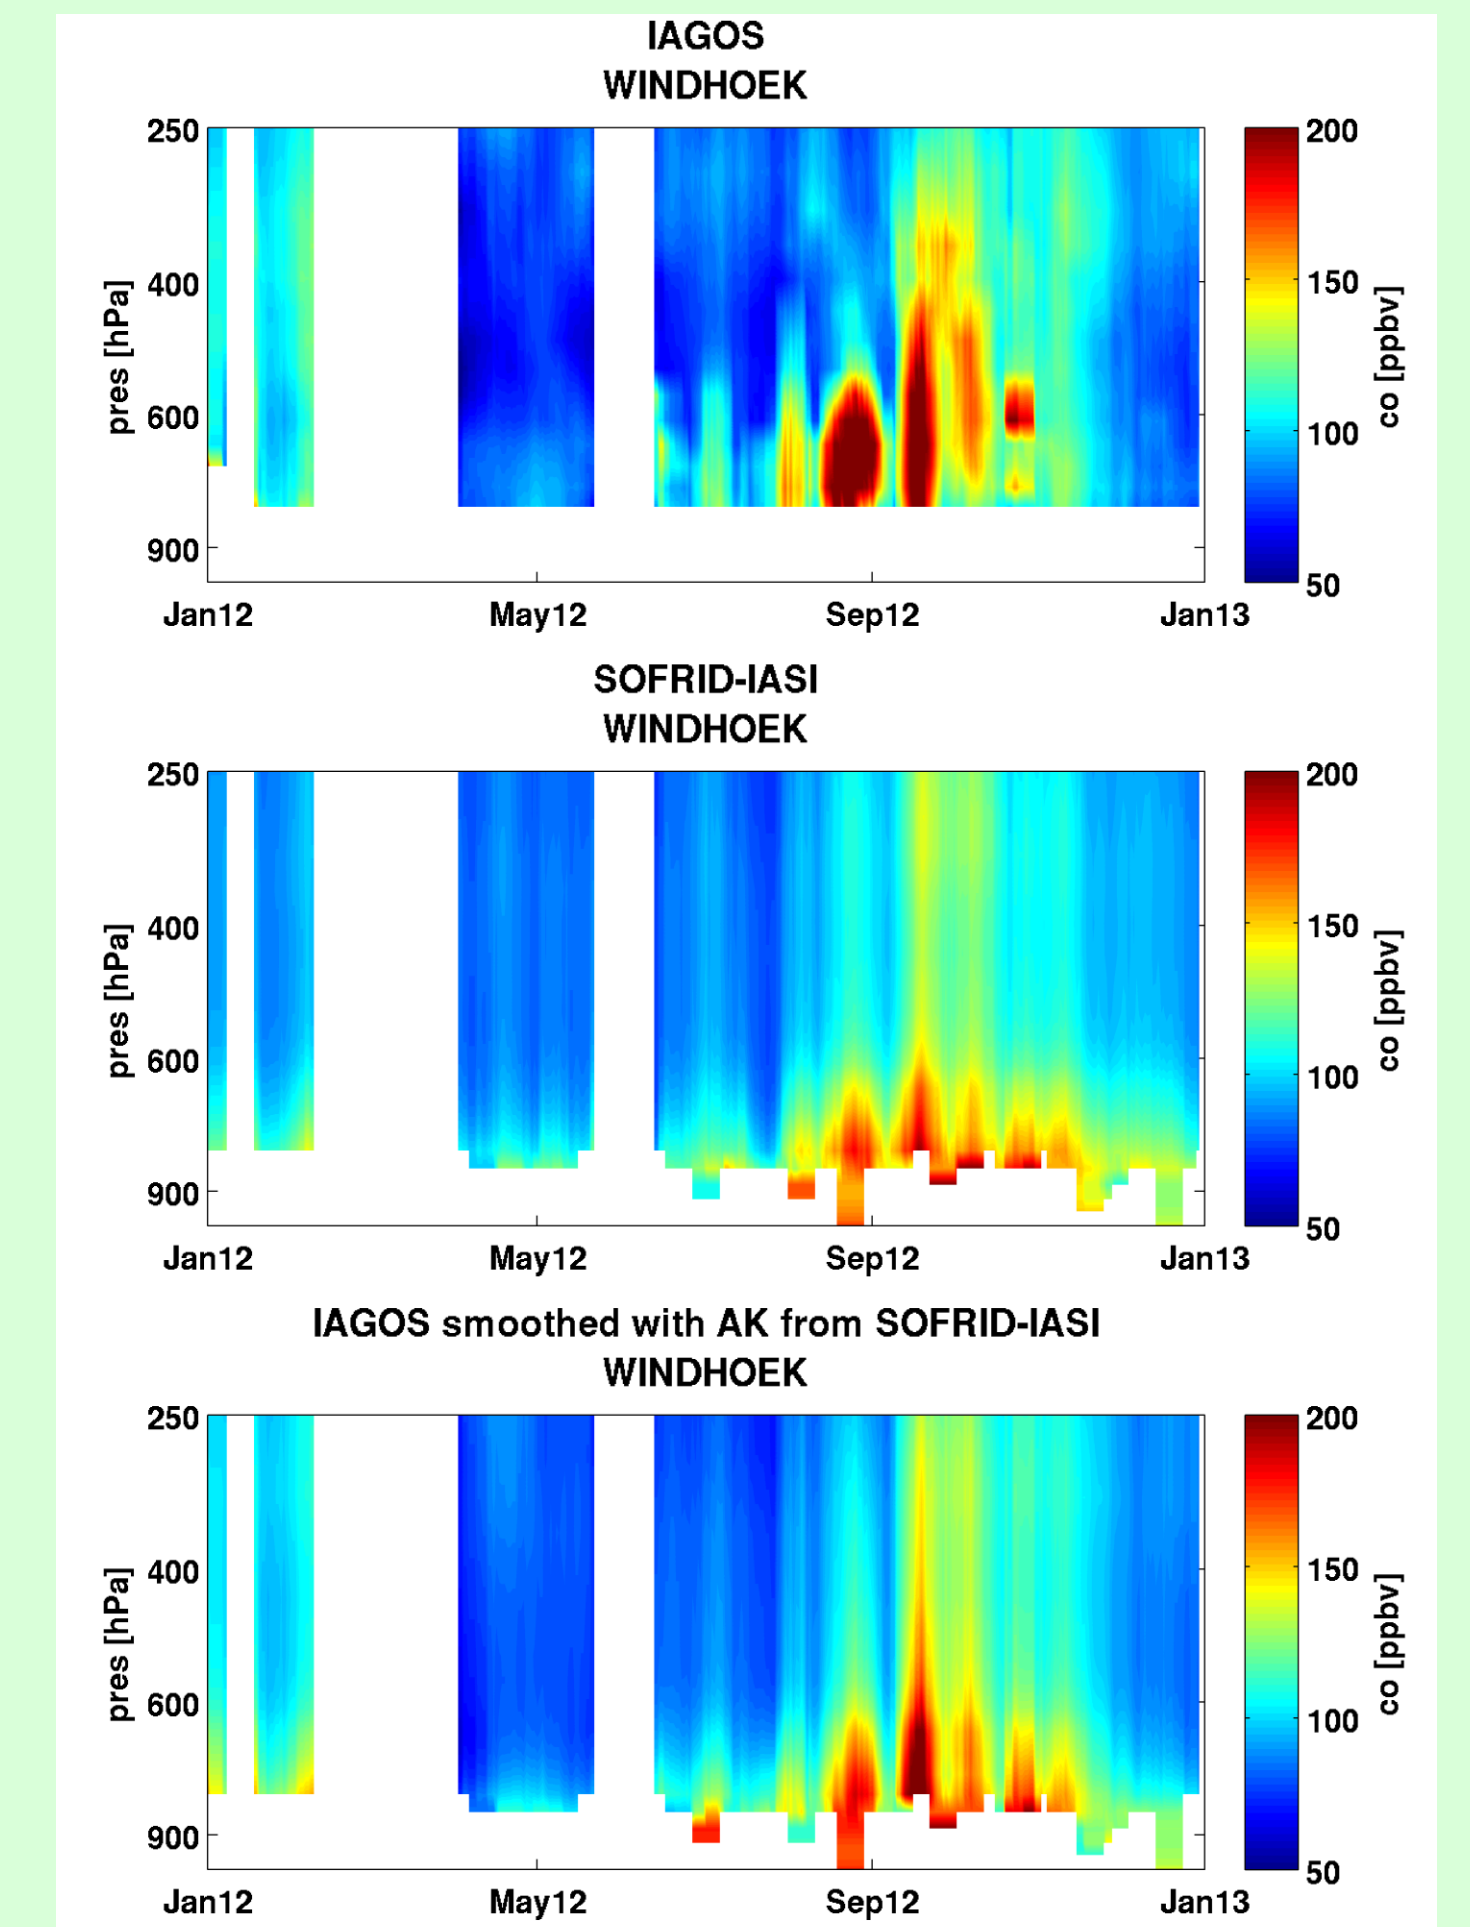

### India - 2013

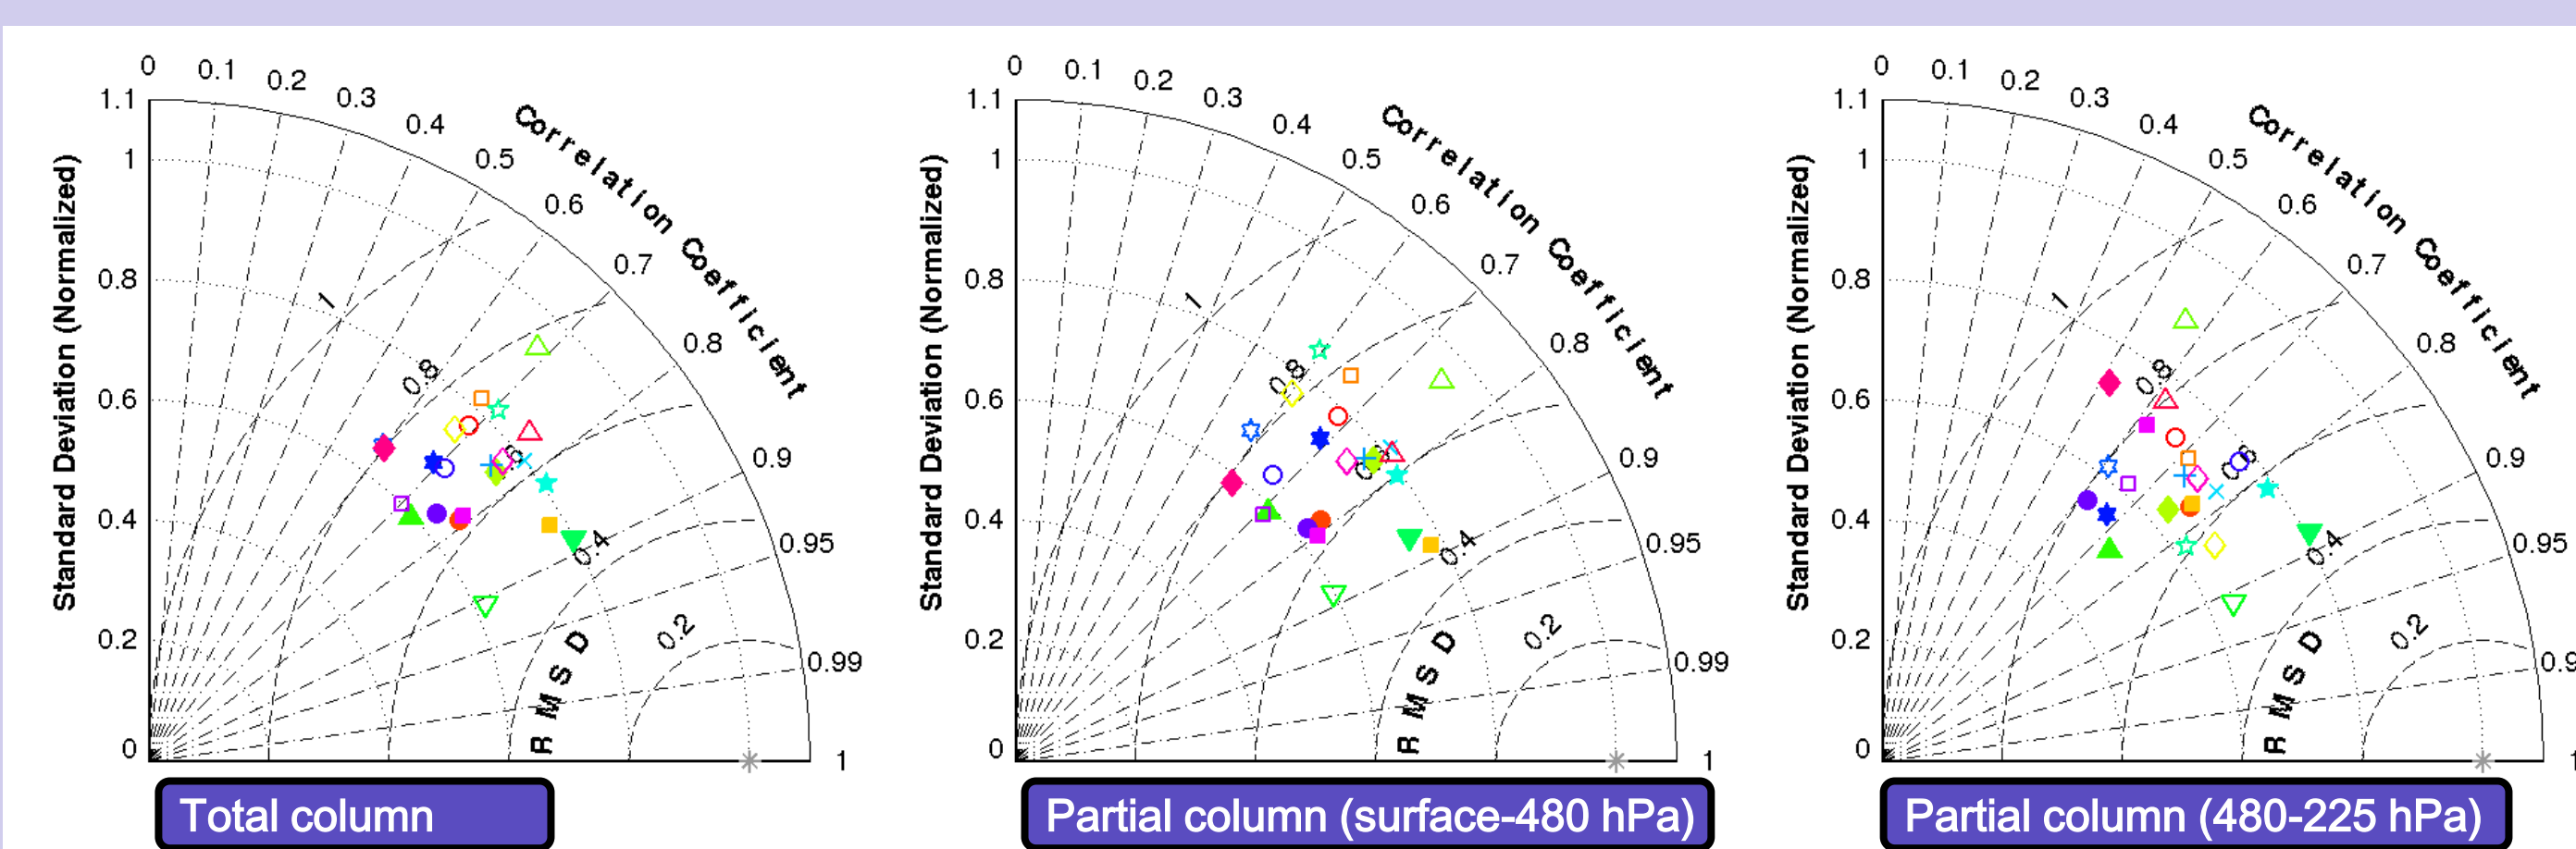

## Biomass burning

### Namibia - 2012

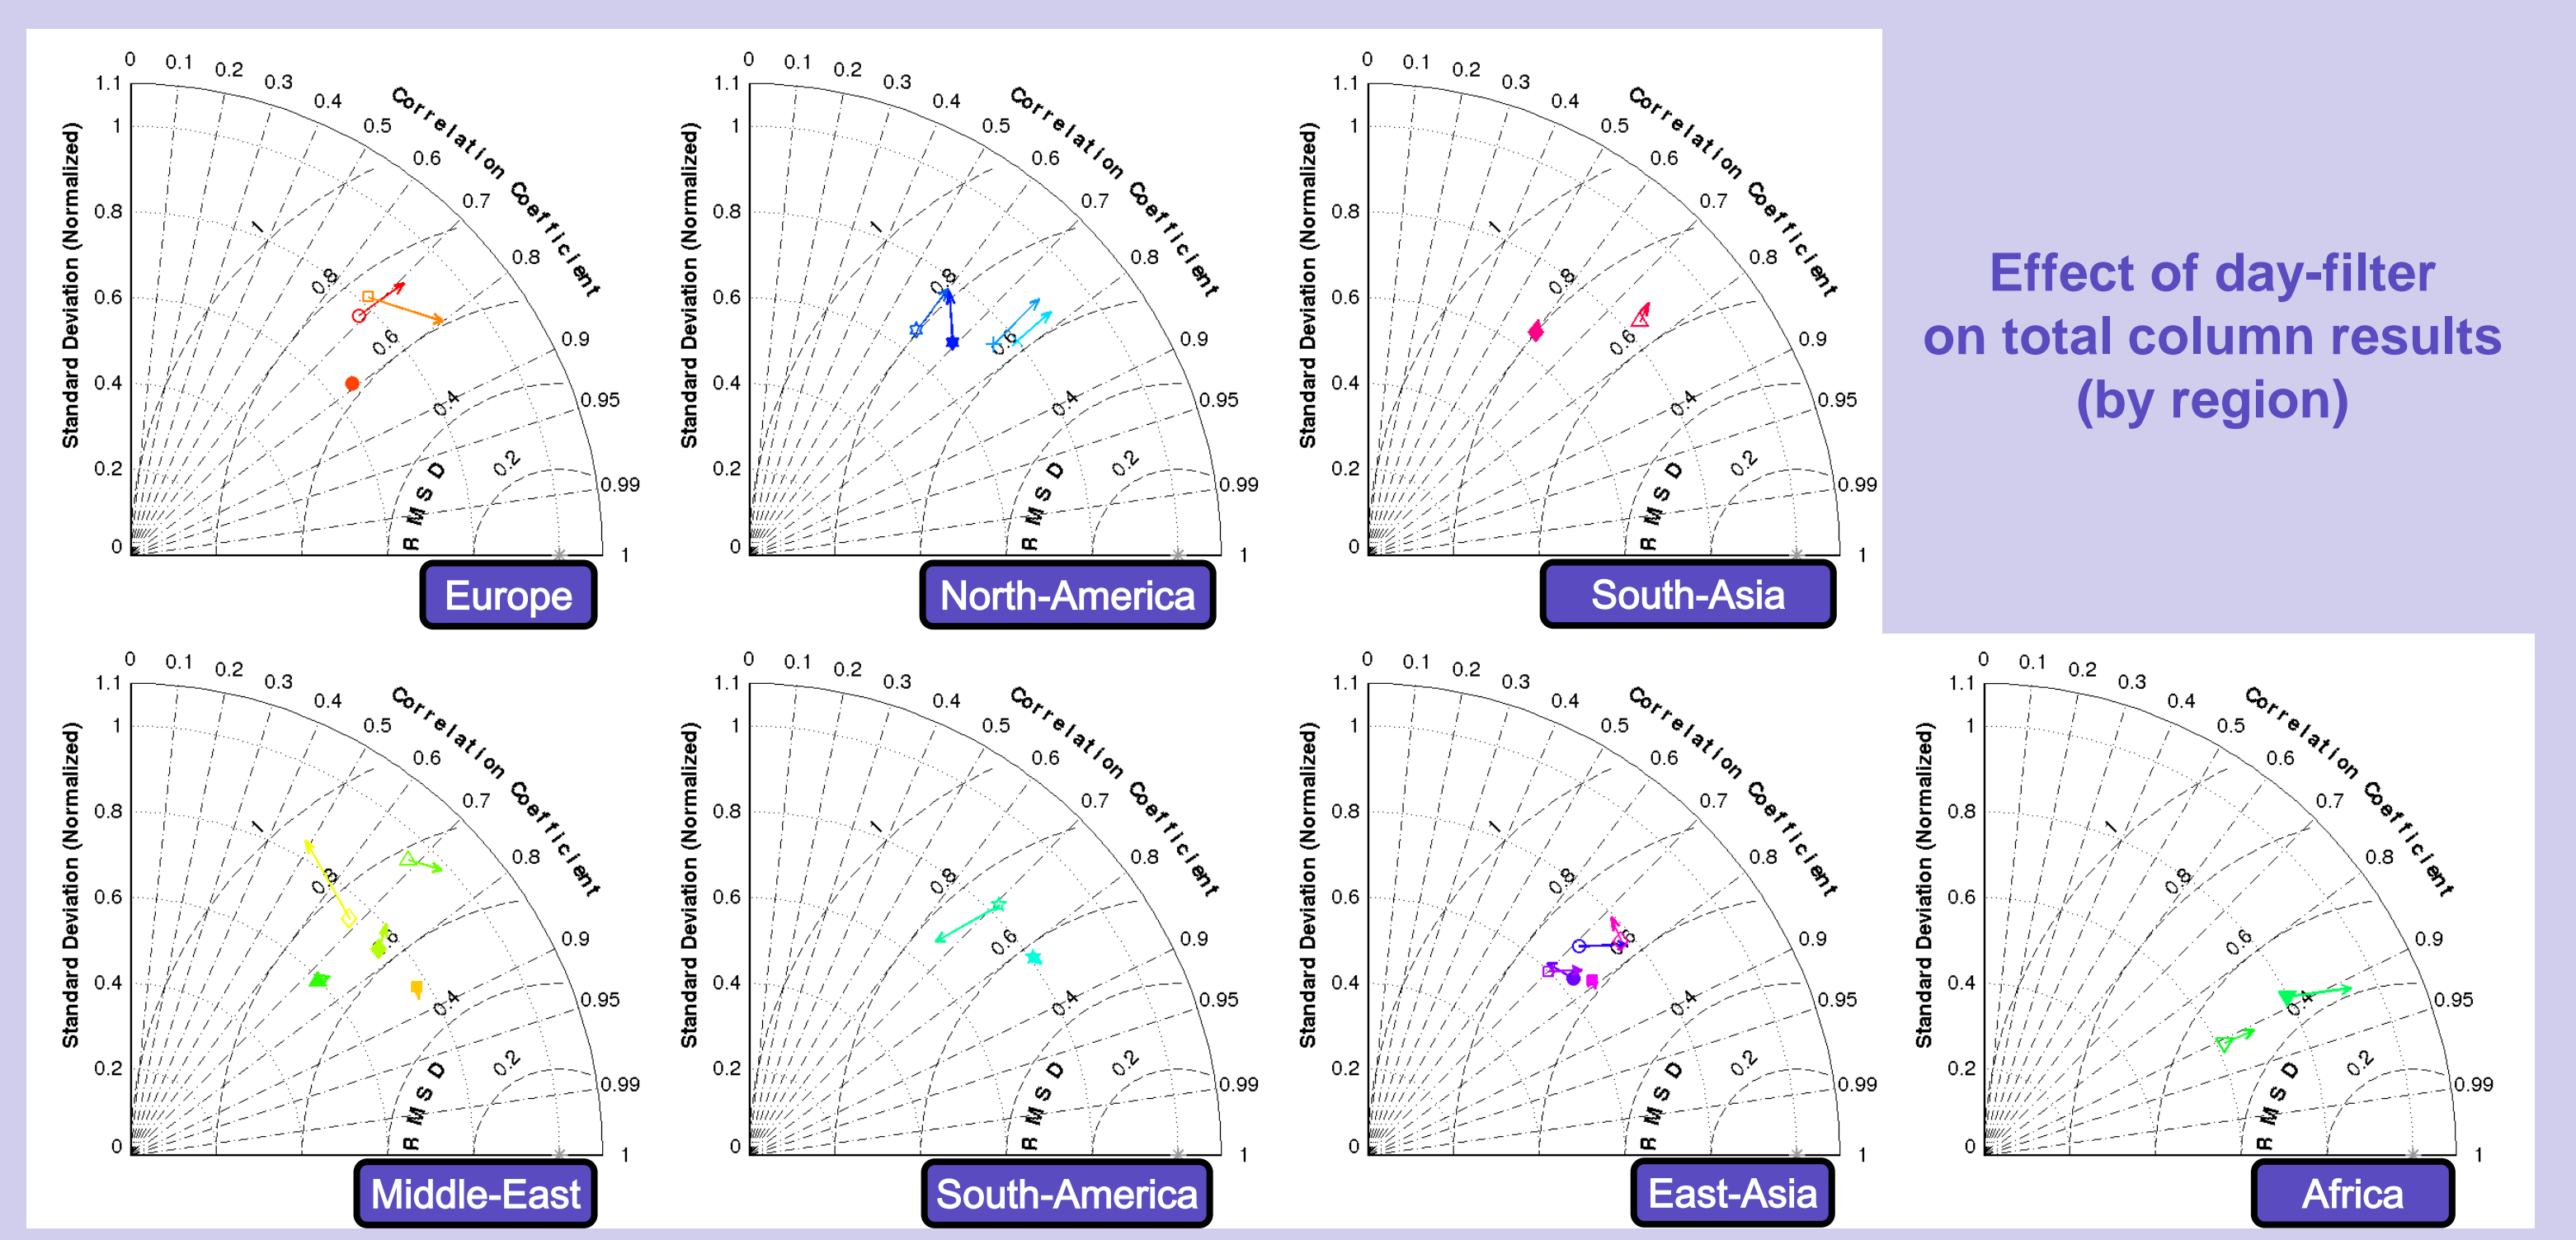

## Validation results 2008-2014

Validation of total and partial columns  
(all airports)

Effect of day-filter  
on total column results  
(by region)

## Acknowledgements

The research work was supported by the IGAS project (IAGOS for GEMS Atmospheric services). The authors are grateful to the European Commission, Airbus, for their strong support of the MOZAIC and IAGOS projects, as well as to the airlines (Lufthansa, AirFrance, Austrian, Air Namibia, China Airlines, Cathay Pacific, Iberia) for carrying the instrumentation free of charge. IAGOS is presently funded by INSU-CNRS (France), Météo-France, CNES, Université Paul Sabatier (Toulouse, France) and Research Center Jülich (FZJ), Jülich, Germany). IAGOS data were obtained from the Ether database at <http://iagos.fr/extract>. MLS L2 data used in this study were provided by the data center of Aura at <http://avdc.gsfc.nasa.gov/Data/Aura/index.html>.

IASI 2016, 11-15 April 2016, Antibes, France
