

Validation and documentation of IASI and companion Metop observations for climate research

-R. Armante, N.A. Scott, - V. Capelle, L. Crépeau, B. Sebag, A. Chédin  
 -Laboratoire de Météorologie Dynamique, Ecole Polytechnique, Palaiseau

**Aim: detect, document, and archive, biases, and trends (natural, spurious), based on statistics of observed vs. computed, or observed vs. observed ancillary (Metop) or auxiliary (LEO-LEO, LEO-GEO) datasets.**

Heritage: (A)TOVS, AIRS/Aqua, IIR/Calipso at LMD
