Conclusions

- Major results presented a very short time after first IASI data available
- This is due to a very good and high performance instrument, the work of the TEC, efficient ground processing and distribution,
- A tremendous amount of work has already been performed on IASI data
- Very promising mission (with 2 other models)
- But a lot of work has still to be done
- Day 2 products and new applications are a good motivation to continue

A scientific group on IASI

- Keep the scientific group gathered here in Anglet for this 1st IASI Conference active through coordinated activities
- A second conference is planned within 2 years (phased with ITSC and others)
